

Quick Interconnect Solutions

Winchester's Quick Connect series was developed to help take the labor and space constraints out of system designs.

Winchester Electronics is pleased to introduce two new connectors to our "Quick Connect" family of RF connectors - the QC-SMA™ and the QC-N.

QC-SMA™ & QC-N Product Benefits:

- Push/Pull connection system allows for quicker mating.
- When mated, the connectors can rotate 360 degrees.
- Electrical performance up to 6 GHz when compared to a standard SMA.
- Compact design that utilizes SMA standard spacing down to .500 centers, and Type N Standard down to .875 centers.
- Designs are available for both flexible and semi-rigid type cables.
- Visit www.cdmelectronics.com for more information.

Winchester's Quick Connect connectors are available at

CDM Electronics, Inc.

ISO 9001:2000
Certified

In addition to the quick connect connectors, custom cable assemblies are also available with lead times of one week or less.

See the table below to configure your part number, or contact your CDM or Winchester Electronics technical representative for assistance.

CDM-	XXX	/XXX	Length(ft)	/XXX
Cable Type	Connector Type			Connector Type
055 = RG55/U	QCN = Quick Connect N Plug			QCN = Quick Connect N Plug
142 = RG142	QCS = Quick Connect SMA Straight Plug			QCS = Quick Connect SMA Straight Plug
223 = RG223	QCSRA = Quick Connect SMA Right Angle Plug			QCSRA = Quick Connect SMA Right Angle Plug
400 = RG400				
240 = LMR-240				
100 = LMR-100				
316 = RG316				
188 = RG188				
174 = RG174				
Example:				
CDM-240/QCN/5/QCN				
LMR-240, 5ft w/ Quick Connect				
N Plug on both end				

Note: Winchester Electronics and Kings Electronics have merged. The combined RF offering is now marketed under the Kings Electronics brand. * Lead times are generally 2-3 days for most products and lengths. Some custom configurations can take longer depending on availability.
