**New Vertical Machining Center
At CDM Electronics**

Turnersville, NJ, March 8, 2021... [CDM Electronics](http://www.cdmelectronics.com) has announced the acquisition and startup of a Haas VF-2 Vertical Machining Center located at their 110 American Boulevard distribution and machine shop location. The VF-2 will be the workhorse of CDM's machining capabilities, most specifically to support their inhouse overmolding program. CDM's comprehensive overmolding capabilities include 3D software mold design, mold manufacturing, plastic injection and end-product final testing. CDM's Turnersville, NJ program complies with the Made in USA standard.

"The VF-2's versatility and high-power spindle will provide an immediate increase in productivity" said Nick Sarin, Assistant General Manager at CDM, "and the large table size will accommodate any job requirement needed." The automated VF-2 has 3-axis capabilities for one-pass cutting of molds in aluminum and other commonly used molding materials. The unit is also self-contained for optimized finishing productivity and enhanced environmental protection.

About CDM

For over 25 years, [CDM Electronics](http://www.cdmelectronics.com) has delivered interconnect product and engineered cable assembly solutions to the world's leading aerospace, military, telecom, automotive, industrial, commercial, and alternative energy providers. Renowned for its unsurpassed levels of customer service and support, the company supplies Original Equipment Manufacturers (OEMs) with full lines of standard and specialty connectors including circular, Mil-Spec, DIN, power, PROFIBUS, rectangular, and RF devices. CDM employs documented and controlled systems in its value-added division, which specializes in mission critical [cable assembly](#), including [RF cable assembly](#), [military cable assembly](#), [power cable assembly](#), and box builds. The company's ISO and AS9100 Certified headquarters is in Turnersville, NJ. CDM maintains a regional office in Richardson, TX.
